

Project – Presentation Rubric

Team Name:

Members:

Absent Members:

Project:

Grade:

Criteria		Points
Section 1: Style		20
1. Use of slides 2. Collaboration as evidenced by all group members taking part in presenting 3. Pace and length (should not be too short, too long, rushed or painfully slow) – Rehearse several times as a group to get it right. 4. Delivery style – Do not merely read from notes or off the slides!		
Section 2 Content and Organization		40
Are the following elements present and clearly explained? 1. Problem definition, background and motivation of the problem domain 2. Description of the dataset 3. Description of methods and models. If you did any original research then describe your novel contributions. 4. Discuss briefly your experimental results – present figures, graphs, tables.		
Section 3: Implementation and Demonstration		60
1. Discuss tools/technology used. 2. Did you write your own libraries or used a third party library? 3. Be prepared to live demonstrate your application such as features, performances, etc. by running the code.		
Section 4: Conclusion and response to audience questions		5
1. Challenges, major successes, and failures. Learning and changes for the next version. 2. Thoughtful response to the questions from audience.
